TL-MUSDON | \$49.99

ENTER THE WORLD OF SMART DECORATIVE LIGHTING!

Get the perfect vibe in or outside your home. Play effects and animations using your phone. Create complex installations by grouping devices together. The Twinkly App enables you to make your decoration truly unique. Apply effects and animations, design your own, control them with a tap. You have unlimited possibilities!

SET UP YOUR DECOR

Put up your decorative lights as you wish. No matter if you want to create a specific shape, wrap an object in light, or go completely random. The Twinkly App will do the rest.

GROUP MULTIPLE TWINKLY DEVICES

There's no need for a physical connection between devices: you can virtually combine up to 6000 LEDs together using the Twinkly App – they just need to be connected to the same WiFi network and be of the same LED profile (RGB, RGB+White or AWW)

PLAY ADVANCED EFFECTS

Choose from a wide range of premade effects from the gallery, or download new ones. You can edit parameters too using the exclusive FX Wizard to design your own, multi-layered effects from scratch. Make your light installation truly unique.

MAP YOUR LIGHTS

Using a unique and patented technology, the Twinkly app will scan your decoration to calculate the exact position of every light bulb, creating a precise layout of your custom object. Once mapped, you can control your lights as if they were a screen: think of every single LED as a pixel. Color them, draw effects, reproduce animations.. The only limit is your creativity.

PLAYLIST

The App's Playlist function gives you a new level of control over your light decoration, allowing you to create a sequence of effects and let them play automatically.

MUSIC

Connect your lights to the Twinkly Music USB microphone and give color and shape to any music you are playing.
